Additional information:

Who is a carer? A carer is someone who provides unpaid care and support to a partner, child, parent, other family member or friend who could not manage without their help. This could be due to age, disability, physical or mental illness or addiction.

Anyone can be a carer and we work with carers aged 8 and above.

Information about Dundee Carers Centre:

Adult carers support team -The adult carers support team provides support to carers through one to one work and group activities. We provide a range of services: practical and emotional support; access to other statutory and voluntary organisations; access to other services within the centre; a variety of groups, alternative therapies and social events; training sessions; peer support; support in bereavement and through transitions; counselling and befriending.

UPBEET Project - The UPBEET project helps young adult carers aged 15-30 years to access confidential information and support in a range of areas. This includes personal development work, raising confidence and self esteem, assessing entitlement to benefits and improving CV/interview skills. We also help young adult carers to access flexible opportunities for combining education, training, or employment with their caring role.

Young Carers Project - The YCP offers a range of services and support to young carers aged 8-18 and their families. This includes: 1:1 support (ages 8-18); weekly groups; family support; accreditation through youth award schemes; short break from the caring role (including residential and holiday programmes) and training.

Black and Minority Ethnic service - The BME team aims to make our information and services accessible to carers and disabled people from minority ethnic communities through the work of multilingual Development Workers. Languages spoken within the team are: Urdu, Punjabi, Mandarin and Cantonese.

Welfare rights - The Welfare Rights service can help to: identify benefit entitlements; fill in benefit application forms; assist with wrong benefit decisions, including reconsiderations and representation at tribunals; help to maximise income. In the previous financial year, the team has supported people to claim more than £1.25 million in benefits people did not realise they were eligible for.

Direct payments support service - A Direct Payment is given by the Local Authority instead of support services to an individual who is eligible for community care support services. This allows the person to organise their own support by purchasing agency services or employing Personal Assistants. Direct Payments is one of the options of self-directed support.

Short breaks service - Carers should be able to take regular breaks from caring and have some time for themselves. This is sometimes called respite but many carer and disabled organisations prefer the term 'short breaks'. Short break provision can give carers a break from their caring role or can give the cared for or disabled person a chance to take a holiday in accessible accommodation. There are many different types of short breaks, ranging from sitter services to longer-term stays.
